DETAILED ACTION

Response to Amendment

1. This Office Action is in response to Applicant's Amendment dated May 27, 2004 in response to USPTO Office Action dated March 29, 2004. The cancellation of claim 2, the amendment to claim 1 incorporating the limitation of objected to claim 2; and the addition of new claims 13-23, including independent claims 13 (incorporating objected to claim 3) and independent claim 23 (incorporating objected to claim 9) are sufficient to place the application in a condition for allowance as indicated in the action hereinbelow.

Allowable Subject Matter

2. Claims 1 and 3-31 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Relative to claim 1, the major difference between the teachings of the prior art of record (Matsuda, USP 6,362,810 and Durrani et al, USP 6,011,542) and that of the instant invention, is that said prior art of record **does not teach** a character input apparatus wherein the support is provided with two rotational shafts that are rotated when the operation unit is inclined and two rotation detection means for detecting a rotation magnitude of each rotation shaft, the two rotation detection means constitute the first detection unit, and the detected output is obtained from the second detection unit when the operation unit is moved in a direction perpendicular to the rotational shafts.

Regarding claim 13, the major difference between the teachings of the said prior art of record

Art Unit: 2673

and that of the instant invention, is that said prior art of record **does not teach** a character input apparatus wherein the control unit selects the data successively based on the output change of the first detection unit when the inclination direction of the operation unit is changed while the inclination of the operation unit that is inclined in a desired direction is being maintained.

As to claim 23, the major difference between the teachings of the said prior art of record and that of the instant invention, is that said prior art of record **does not teach** a character input apparatus wherein a particular angular range uniquely and permanently defines a particular character data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
